NATIVE CONVERSION SUITE - one page

42 panels / vector mode expected / zoom in to inspect / outlines are not live text

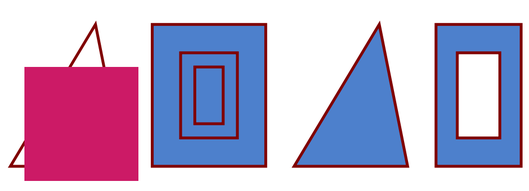

01. Paths, curves, fill rules, stroke styles

m l c v y h re; f f* S; dash, cap, join, miter, zero-width fill

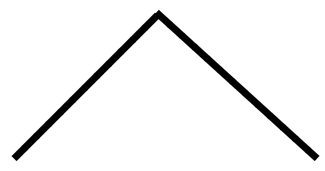

02. Paint operators and nonzero clipping

F s B B* b b* n; W nonzero clip; fill + stroke

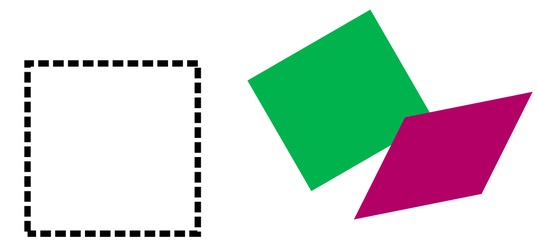

03. ExtGState line style

LW LC LJ ML D via gs

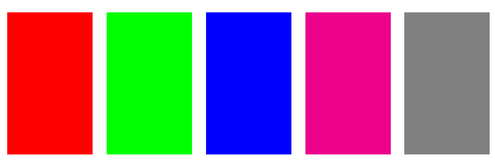

04. Transforms and graphics state

q/Q; translation, uniform scale, rotation; shear/nonuniform fills

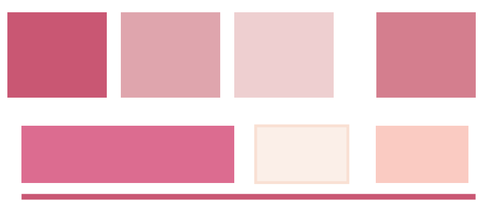

05. RGB, CMYK and gray

DeviceRGB / DeviceCMYK / DeviceGray

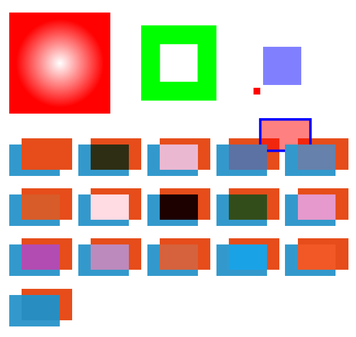

06. Spot tints and overprint

Type2/Type4; tints; OPM1; DIC CMYK to Lab book / Lab input

07. Forms, clipping, radial, all 16 blends

nested resources, Form BBox/matrix; W*; fill/stroke opacity

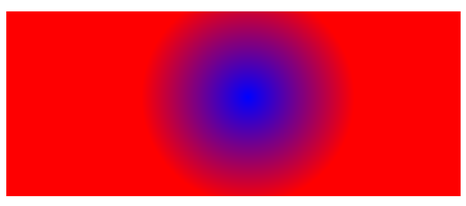

08. RGB axial gradient

direct sh; extended ends; Type2 function

09. RGB radial gradient

direct sh; extended ends; Type2 function

10. CMYK axial gradient

direct sh; extended ends; Type2 function

11. CMYK radial gradient

direct sh; extended ends; Type2 function

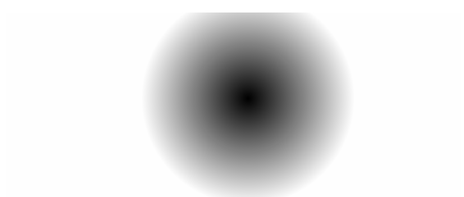

12. Gray axial gradient

direct sh; extended ends; Type2 function

13. Gray radial gradient

direct sh; extended ends; Type2 function

14. Nonlinear gradient

positive exponent N=2; editable adaptive stops

15. Stitched gradient

continuous Type3 function / two Type2 functions

16. Rotated gradient pattern

PatternType2; rotation/translation matrix

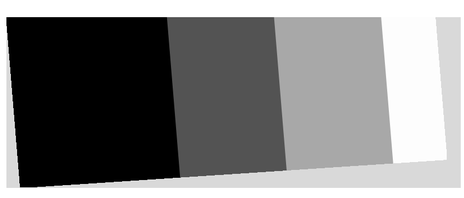

17. Image: gray1

image transform + clipping; opaque/alpha as applicable

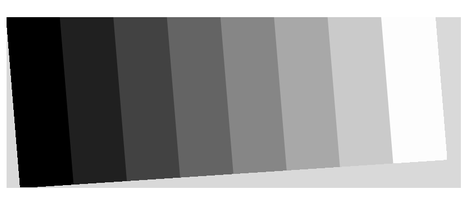

18. Image: gray2

image transform + clipping; opaque/alpha as applicable

19. Image: gray4

image transform + clipping; opaque/alpha as applicable

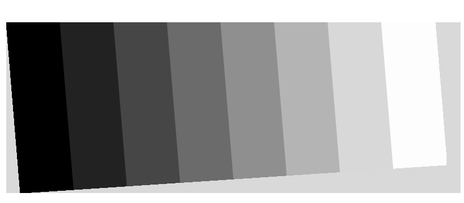

20. Image: gray8

image transform + clipping; opaque/alpha as applicable

21. Image: gray16

image transform + clipping; opaque/alpha as applicable

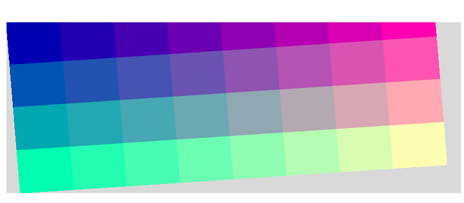

22. Image: cmyk

image transform + clipping; opaque/alpha as applicable

23. Image: rgb16

image transform + clipping; opaque/alpha as applicable

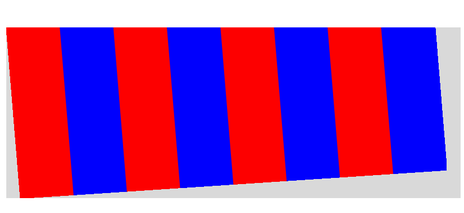

24. Image: cmyk16

image transform + clipping; opaque/alpha as applicable

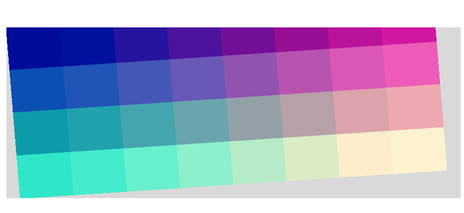

25. Image: indexed

image transform + clipping; opaque/alpha as applicable

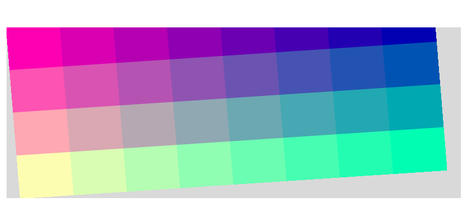

26. Image: jpeg

image transform + clipping; opaque/alpha as applicable

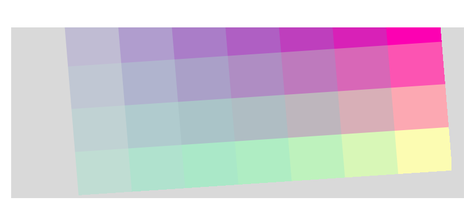

27. Image: decode

image transform + clipping; opaque/alpha as applicable

28. Image: soft-mask

image transform + clipping; opaque/alpha as applicable

29. Image: cmyk-soft-mask

image transform + clipping; opaque/alpha as applicable

30. Image: hard-mask

image transform + clipping; opaque/alpha as applicable

31. Image: color-key

image transform + clipping; opaque/alpha as applicable

32. Image: stencil

image transform + clipping; opaque/alpha as applicable

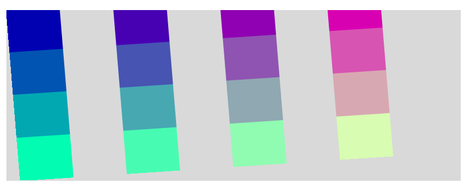

33. Image: stencil-inverted

image transform + clipping; opaque/alpha as applicable

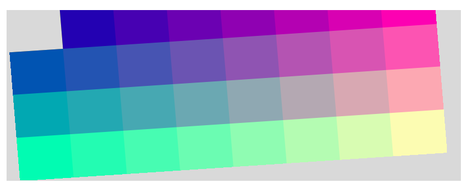

34. Image: rgb

image transform + clipping; opaque/alpha as applicable

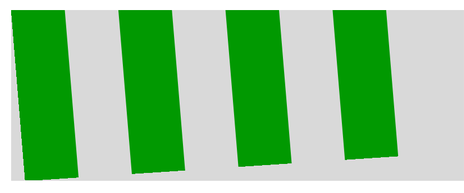

35. Standard Latin fonts

12 standard fonts; automatic editable outlines

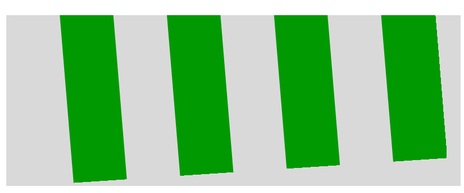

36. Text modes, encoding and spacing

Tr 0..7; TJ, quote, double quote; Tc Tw Tz Ts TL; WinAnsi/MacRoman/Differences

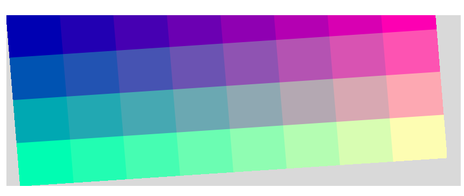

37. Embedded font: cid

font program; PDF widths; CIDToGIDMap/Identity-H

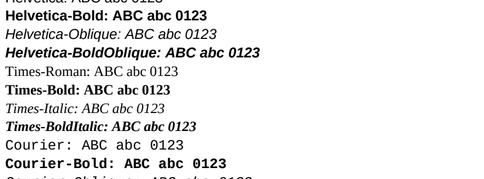

38. Embedded font: ttf

font program; PDF widths; CIDToGIDMap/Identity-H

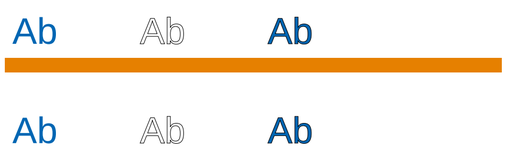

39. Embedded font: opentype

font program; PDF widths; CIDToGIDMap/Identity-H

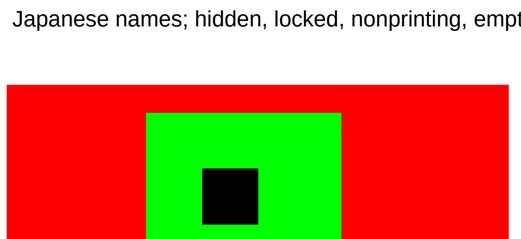

40. Embedded font: cff

font program; PDF widths; CIDToGIDMap/Identity-H

41. Layers and structural tags

Japanese names; hidden, locked, nonprinting, empty

42. Text clip and rotation

rotated text outline and text clipping
